Profile

I am a designer with a Bachelor's degree in Communication Design (B.A.) and am currently pursuing a Master's degree in Media and Game Design. My focus lies on digital creative technologies, specifically 3D modeling with Blender, Virtual Reality (VR), Augmented Reality (AR), and interactive applications. Complementing this, I work on graphic design and layout, as well as the conceptualization and design of print and digital media. I am particularly interested in the intersection of design, technology, and interactive user experiences.

Education

since 2025

Master Media and Game Design
Hochschule Harz

08/2023 – 01/2024
